## Overview

You are looking for specific information but in the thousands of pages of Business Objects documentation, where should you even begin to look?

This roadmap provides you with a starting point for approaching documentation about installing, configuring and using your Business Objects solution. The roadmap table is divided into the following major categories, loosely based on typical stages in the deployment and use of the Business Objects solution:

- [General reading before installation](#)
- [Installing and configuring application servers](#)
- [Setting up connectivities](#)
- [Installing Business Objects products](#)
- [Configuring the system](#)
- [Creating and managing the repository](#)
- [Designing and managing universes](#)
- [Tuning and administering the solution](#)
- [Using Business Objects products](#)
- [Customizing your solution](#)
- [Troubleshooting your solution](#)

Each of these categories contains a list of topics about which Business Objects users typically ask questions, such as "Deployment procedure," "Security," "Migrating a repository to a newer version," or "Getting your users started." For each topic, the table displays at least one specific place you can look for information — and often several.

## Where can you find each document or guide?

The right-hand column in the roadmap table displays the format in which you can obtain each document, guide or multimedia product:

You can order the documentation CD from the Documentation Supply Store at <a href="http://www.businessobjects.com/services/documentation.htm">www.businessobjects.com/services/documentation.htm</a>
P	Printed	Available in printed book format. You can order printed documentation online from the Documentation Supply Store <a href="http://www.businessobjects.com/services/documentation.htm">www.businessobjects.com/services/documentation.htm</a> or from your local Business Objects sales office.
