

# BUSINESSOBJECTS PERFORMANCE MANAGER XI R1/R2: MEASURING PERFORMANCE (REVA)

PM350R2

## Course Description

BusinessObjects™ Performance Manager XI enables you to create scorecards that, by aligning with Key Performance Indicators (KPIs), track performance across the enterprise. Building on existing BusinessObjects Dashboard Manager knowledge, this course provides demonstrations and hands-on activities that take you from building goals to automating goal-based alerts through rules.

As a business benefit, you will be moving beyond tracking historical performance to mapping out strategies for future performance and aligning goals that can then be monitored against actual data.

## Course Audience

The target audience for this course is Performance Management designers who are comfortable working in Dashboard Manager and need to create goal-based analytics, strategies and alerts to display for business users through corporate dashboard applications.

## Prerequisite Education

To be successful, you should have previously attended the following offerings:

- BusinessObjects Dashboard Manager: Designing Dashboards

## Prerequisite Knowledge/Experience

Not applicable for this offering.

## Additional Education

Not applicable for this offering.

## Level, Delivery, and Duration

This instructor-led offering is a one-day course.

## Applicable Certification

Not applicable for this offering.

## Additional Information
